

## Infield Systems Limited - “The Energy Analysts”

### About Infield Systems

Infield Systems is an independent energy research and analysis firm that is dedicated to the provision of accurate and up-to-date data, market reports, mapping, analysis and forecasts for the offshore oil and gas and associated marine industries. Infield Systems also prepares market due diligence on mergers, acquisitions and transactions for clients in the energy industry. Infield Systems services clients in over 40 countries, including E&P companies, contractors, manufacturers, government agencies and financial institutions, and is widely acknowledged as the definitive independent source for information, research and analysis on the offshore energy sector.

Infield Systems’ team of experienced analysts and researchers have developed a range of products and services designed to assist senior executives making informed business decisions. Infield Systems operates with the highest standards of accuracy, clarity and professionalism to gain results, whether it is supplying or managing raw data for internal company use or providing high-level strategic views on global market developments.

All of Infield Systems products and services are supported by direct access to senior analysts and support personnel, ensuring high standards of service and responsiveness across the globe.

Infield Systems range of in-house skills include all the major industry disciplines from geology, finance and law through to senior operational management, allowing for the provision of data, information and reports that are realistic, accurate and insightful. Infield’s reports and services are used to support business decisions at a senior level and as such are presented with a clarity and conciseness that has brought international acclaim.

Products and services are broadly divided into the following key areas;

- Data Services
- Market Forecast Reports
- Online Mapping
- Business Strategy & Analysis
- Transaction Service

### Business Strategy & Analysis

Infield Systems has established itself as a leading provider of bespoke consultancy and research reports to clients in the offshore oil and gas and associated marine industries. The Business Strategy & Analysis team have delivered hundreds of studies covering: new market entry, customer targeting and referencing, new product launches, market size gauging and business plan support. Studies have been undertaken for a wide range of clients, from major exploration and production companies, through to contractors, equipment manufacturers, to national governments and agencies. The core strength of the Business Strategy & Analysis team is its ability to draw on Infield Systems’ independently researched databases, market models and information resources, in conjunction with utilising an excellent global network of contacts, to provide the answers to the most difficult questions facing industry executives and professionals.

The Business Strategy & Analysis team’s services are always bespoke and individually tailored to each client. Some of the more popular offerings are highlighted below, however the team prides itself on having the analytical capacity and skills required to react to even the most demanding of client requirements:

- Market Matching & Market Tracking - “Match & Track”
- Complete market intelligence outsourcing
- Bespoke services
- Market entry strategy
- New product launch / Major investment decision support
- Procurement strategy advisory
- Ad-hoc analysis

### Transaction Services

Infield Systems’ Transaction Services unit is a leading offshore oil and gas advisor to the global financial community. Building upon Infield Systems’ years of research and experience, the Transaction Services team advises public and private institutional investors through M&A, asset finance, debt and IPO transactions. Areas of specialisation span offshore oil and gas production infrastructure, marine and rig assets, engineering and fabrication capabilities.

Key product areas include:

- Pre IPO due diligence
- Debt financing analysis
- Distressed asset purchases
- Market due diligence

## Data Services

Infield Systems has been providing research and information on the offshore oil and gas industry for the past 25 years. In that time the team have built up an extensive network of contacts, sources of information and knowledge as well as developing expertise in making the company's research accessible to its clients.

In addition to the offshore oil and gas industry databases, Infield Systems has added specialist vessels, platform supply vessels, anchor handling vessels, drilling rigs, construction yards, contracts and ROV's to the company's suite of databases.

Data is provided through subscriptions, mapping, bespoke analysis and projects and published market reports depending upon the requirements of the client.

## Global & Regional Market Reports

Infield Systems publishes a range of market reports covering various aspects and regions of the oil, gas, renewable energy and associated marine industries. Utilising comprehensive in-house project databases, industry models and research capacity these reports are widely used by industry analysts and professionals.

The market update reports provide detailed information, analysis and insight into market trends over the next five years, which is presented in a manageable, clear and concise manner. The integration of the Offshore Energy Database, the Specialist Vessels Database, the construction and fabrication yards database, the drilling rigs database along with Infield Systems' OFFPEX Market Modelling and Forecasting System means that each report contains uniquely detailed and up to-date analysis. Infield Systems range of Global Perspective Market Reports covers the following sectors and regions:

- Deepwater
- Subsea
- Pipelines & Control Lines
- Fixed Platforms
- Floating Production
- Offshore LNG
- FPSO
- Heavy Lift
- Heavy Transport
- Accommodation
- Specialist Vessels
- SURF Vessels
- Subsea Well Intervention
- ROVs
- Wind Farms
- Africa
- Arctic
- Asia
- Australasia
- Middle East & Caspian
- Latin America
- West Africa

## Online Mapping

Infield Systems have developed a unique online GIS and mapping tool for the offshore oil, gas, renewable energy and associated marine industries - The Offshore EnergyGateway. The Offshore EnergyGateway mapping and data system enables Infield Systems to offer its clients a geographic tool to view critical data covering infrastructure and assets, such as existing and future oil and gas fields, current operator and field ownership, pipelines, offshore platform facilities, LNG terminals, offshore wind farms, major ports and heliports. The GIS team have also developed a database and geographic layers for all of the licence blocks, licence block operators, coastlines, country boundaries, median lines and bathymetry which overlay the infrastructure and asset layers.

The Offshore EnergyGateway can be accessed through any Internet browser where the user can utilise a series of tools to search, download and export maps and data as well upload their own GIS company specific data to integrate and overlay with the EnergyGateway mapping system.

The Offshore EnergyGateway can be used to;

- Support client forecasting
- Assist in tendering process
- View specific regional projects and campaigns

The GIS team are also able to provide specific custom maps and analysis using Infield's GIS systems.

## Wall Maps

Infield Systems Limited publishes wall maps for the oil, gas, renewable energy and associated marine industries. These maps are distributed through the Infield Shop and at many trade events, conferences and exhibitions throughout the year.

The maps are produced from the Infield Offshore EnergyGateway Online Mapping and GIS system and include information from the Offshore Energy Database and forecast expenditure, analysis and commentary from the OFFPEX Market Modelling and Forecasting System.

Infield Systems' range of published wall maps include:

- Offshore Asia Pacific Oil & Gas Activity Map To 2015
- Offshore Latin America Oil & Gas Activity Map To 2015
- Gulf of Mexico Infrastructure & Integrity Map To 2014
- Offshore West Africa Oil & Gas Activity Map To 2016
- The North Sea Oil & Gas Infrastructure & Activity Map To 2015
- The Arctic Frontier Oil & Gas Activity Map To 2015
- The World Host & Satellite Oil and Gas Field Development Map to 2016
- The Offshore Norwegian, Baltic and Barents Seas Oil and Gas Activity Map to 2017
