## About MCS

**MCS** was founded in the year 1999 under the law of Free Zone companies.

By the middle of year 2011, MCS staff reached One hundred and fifty two full time employees distributed as: Management team, Software R&D, Data processing engineers and Drilling engineers.

**MCS** has been involved in many projects and has developed nine software information solution packages for the oil and gas industry.

So far, **MCS** has completed tens of projects in different geographical areas of the globe serving the oil and gas industry in the following business areas:

- **MCS** has been providing data acquisition and management services for the oil and gas companies in the areas of underwater pipeline and platform inspection.
- **MCS** provides Drilling data management software, services and professional technical support for their packages.

### Our Vision:

**MCS** has brought together a leadership team with a common vision and diverse experiences, all of whom contribute to managing the growth and direction of the company. Our vision is to provide continuous value addition to our clients with the best and most innovative technologies by delivering excellent software services.

At **MCS**, we share a common goal which is delivering the best services to our customers. This passion takes different forms: writing a code, conducting research, working in sales, marketing, data processing or operations. It is a shared passion for creativity and excellence.

Our services empower thousands of users in the oil and gas industry, that's why **MCS** is committed to the belief that great software productivity tools help building great businesses.

We have worked hard to create our business and corporate identity to provide competitive products and services that our customers can trust.

### Our Mission:

To deliver and develop superior services that allows our customers to dramatically improve their development and management of their infrastructure and to be the first choice for our customers in our business areas. This will be achieved by adding value, high level of product knowledge, sales and marketing support.

## **Our Values:**

### **We believe in three core values:**

- Ethics, integrity and respect in all our dealings with customers, partners and employees.
- Quality in products we provide and support.
- Value to our customers.

The ideas and passion that got this company started is the framework that makes MCS what it is, a family brought together through hard work and mutual respect for what each person brings on a daily basis.

## **Our Services:**

### ***Software Development***

We have a long expertise in software development and database applications. We are focused on the oil & gas industry marketplace and we excel by our team's ever growing capabilities in software solutions analysis and development.

### ***ROV Pipeline and Platform Inspection Survey / Data Acquisition, Processing and data management***

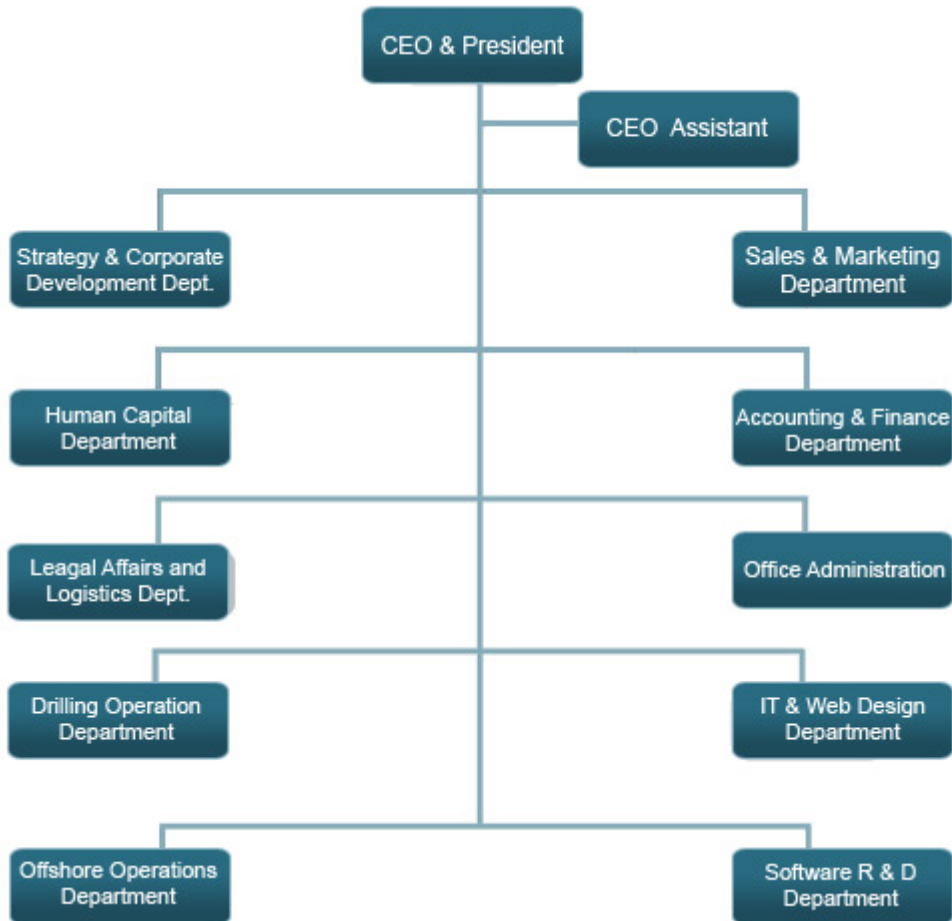

We take over turnkey data processing jobs in offshore pipeline inspection projects. We provide the software, hardware and our highly qualified personnel that handle all the data logging, processing and charting tasks.

### ***Drilling Data Management & Support***

To ensure smooth operation, we provide our customers with our highly trained personnel upon their request to provide the maximum productivity out of our software and gradually transfer their experience to the customer staff. We provide onsite technical support engineers for the drilling data management software packages.

## MCS Organization Chart

People are MCS most valuable asset. By middle 2010, MCS workforce reached 140 permanent staff in addition to external consultants.

**Our Customers:**

## Quality Systems:
